Uzbekistan Kokand

FullStack Developer working with Node.js / Vue.js to deliver exceptional customer experiences. Adept at contributing to a highly collaborative work environment, finding solutions, and determining customer satisfaction.

WORK EXPERIENCE

Trash talkin platform

A web platform for fun and open user interaction.

This commercial project was developed for a client via Upwork using Nest.js. It enables users to share humorous and informal posts ("trash talk") with features like authentication, role-based access, content moderation, and admin panel tools.
The backend is built with a modular architecture and focuses on clean, secure APIs with proper validation and maintainability in mind.

Grosery Shopping

Site for food shopping
You can see the back end of this site through this link
~ This site was written in Nest.js and Sequelize and saved on PostgreSQL
~ The site will ask you to enter your phone number to purchase the product and you will receive an SMS, after entering the code, if the SMS is correct, you can purchase with confidence. Eskiz.uz site was used for sms.

Crm system

This crm system is a very convenient site for schools or courses
You can see the front end of this site through this link
~ This site was written in Vue.js with Pinia.
~ This Crm system has separate layouts for principal, teacher and students. For example, the director can control teachers by layout, determine in which room, how many and which teachers the class will be in, the student can see only these, the teacher can control all students, there is also pagination.
~ We built this site as a team while studying
